Education

Arizona State University, Ira A. Fulton Schools of Engineering

GPA: 4.17 (Dean's List)

B.S. in Computer Science - Software Engineering

May 2027

Experience

Handshake AI – AI Model Evaluation Fellow

May 2026 – Present

- Evaluated **120+ AI-generated responses** across **6+ projects** using rubric-based scoring for accuracy, reasoning, instruction following, and consistency to improve response quality.
- Analyzed **75+ image-based model outputs**, flagging hallucinations, missed visual details, and edge cases to strengthen multi-modal evaluation workflows
- Reviewed LLM responses against **persona, tone, style, and alignment rubrics**, delivering structured feedback to improve conversational consistency and training data quality.

Alumni Advisor – Podium Education (Global Career Accelerator)

July 2026 – Present

- Advise prospective students over **25+ inbound calls and chats daily (150+ weekly)** across a 5-day schedule, guiding them through program fit and next steps/
- Converted **40%+ of leads** into enrollees using **Salesforce** to manage outreach, follow-ups, and pipeline tracking across a 5-day schedule.

Projects

Arverié – AI Art Therapy

2026

React, JavaScript, Python, Tailwind CSS, Claude API, Hume EVI 3, Canvas 2D

- Built a dual-mode voice interaction system with **Hume EVI** and Claude for therapeutic prompting, reaching **1-2 second response latency** on logic-based interruptions.
- Engineered a custom drawing canvas tracking **12+ behavioral metrics** for anxiety analysis while maintaining **60 FPS** during concurrent voice processing.
- Designed **session persistence** in **Supabase** for canvas snapshots and AI reflections, with a journal UI surfacing AI-generated summaries and anxiety indicators.

CareCaller AI – Real-Time Medical Call Assistant

2026

TypeScript, Python, FastAPI, React, AWS Transcribe Medical, AWS Comprehend Medical, Claude API

- Built a real-time medical call assistant using **AWS Transcribe Medical** and pyannote speaker diarization, reaching **91% transcription accuracy** with SOAP-format summaries generated in **under 8 seconds**.
- Applied **AWS Comprehend Medical** for NER and medication normalization at **94% precision**, layering Claude for clinical reasoning and deploying the full stack with FastAPI and React.

Trupti Fashion AI Customer Assistant

2026

n8n, OpenAI API, WhatsApp Business API, Google Workspace

- Built an automated WhatsApp support workflow in **n8n** using **OpenAI API and WhatsApp Business API**, supporting back-and-forth customer conversations on product, sizing, and pricing with persistent memory.
- Integrated Google Sheets as a **live inventory knowledge base**, enabling a small clothing business with no website to answer customer questions accurately without manual lookup.

Technical Skills

- **Languages:** Python, Java, C++, , TypeScript, SQL, Scheme, Prolog
- **Web & Frameworks:** React, FastAPI, Flask, HTML/CSS, Tailwind CSS, Framer Motion, GSAP, Canvas 2D
- **AI/ML:** Claude API, OpenAI API, Hume EVI 3, AWS Comprehend Medical, AWS Transcribe Medical, Prompt Engineering
- **Tools & Platforms:** Git, Supabase, AWS, n8n, WhatsApp Business API, Google Workspace, Microsoft Office Suite

Certifications

- AI Fluency: Frameworks & Foundations – Anthropic
- AI Professional Skills Certification – Global Career Accelerator
- Web Development – Global Career Accelerator
- Software and App Design – Arizona Department of Education
